DELAWARE RIVER BASIN COMMISSION

Notice of Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold an informal conference followed by a public hearing on Wednesday, December 10, 2008. The hearing will be part of the Commission's regular business meeting. The conference session and business meeting both are open to the public and will be held at the Commission's office building, located at 25 State Police Drive, West Trenton, New Jersey.

The conference among the commissioners and staff will begin at 10:30 a.m. Topics of discussion will include: A presentation on Philadelphia water conservation and stormwater management approaches by a representative from the Philadelphia Water Department; a presentation by University of Pennsylvania students on responses to climate change in the Delaware Basin; a status report by a representative of the Commission and the parties to the 1954 Supreme Court Decree in *New Jersey v. New York*, 347 U.S. 995, 74 S.Ct. 842, concerning the Flexible Flow Management Program (FFMP); and a presentation on the New York City Delaware system tunnel closure by a representative from the New York City Department of Environmental Protection. The Commission will not take action on December 10 to adopt amendments to the DRBC *Water Code* to implement the FFMP.

The subjects of the public hearing to be held during the 1:30 p.m. business meeting include the dockets listed below:

1. *Aqua Pennsylvania, Inc. D-81-61 CP-4*. An application for approval of a ground water withdrawal project to

renew the allocation included in Docket D-81-61 CP-3 and consolidate all other docket approvals for the Fawn Lakes, Woodloch Springs and Masthope water systems, retaining the existing withdrawal from all wells of 18.38 million gallons per thirty days (mg/30 days). Docket D-81-61 CP-4 will consolidate allocations approved in dockets D-81-61 CP-3, D-87-96 Renewal, and D-89-57 CP Renewal. The projects are located in the Catskill Formation in the Westcolang Creek Watershed in Lackawaxen Township, Pike County, Pennsylvania, within the drainage area to the section of the non-tidal Delaware River known as the Upper Delaware, which is designated as Special Protection Waters.

2. *Hercules, Inc. D-87-43-3*. An application to replace the withdrawal of water from Wells PW-4 and PW-10 in the applicant's ground water remediation system because of diminished yield and inefficiencies. New Wells PW-4R and PW-10R have been drilled as replacements. The applicant requests that the total approved withdrawal for all the wells in the system remain at 18 mg/30 days of water. The existing and replacement wells are located in the Magothy/Raritan and Cape May Aquifers in the Delaware Watershed in Greenwich Township, Gloucester County, New Jersey.

3. *Lehigh County Authority D-2001-20 CP-4*. An application to replace the withdrawal of water from Well No. WL-12 in the applicant's water supply system because it has become an unreliable source of supply. The applicant requests that the withdrawal from replacement Well No. WL-12R be limited to 30.240 mg/30 days of water, and that the total withdrawal from all wells in the system remain limited to 256.24 mg/30 days. The project is located in the Allentown Formation in the Little Lehigh Creek Watershed in Lower Macungie Township, Lehigh County, Pennsylvania. The site is located within the drainage area to the section of the non-tidal Delaware River known as the Lower Delaware, which is designated as Special Protection Waters.

4. *Unimin Corporation D-2007-14-2*. An application for renewal of approval to discharge up to 2.275 mgd through existing Outfall 001A to Dividing Creek from a hydraulic dredging operation. The applicant also discharges to an unnamed tributary to Dividing Creek, through Outfall 002A during large storm events. The facility is located in the Dividing Creek Watershed in Commercial and Downe townships, Cumberland County, New Jersey.

5. *Borough of Bally D-78-19 CP-2*. An application for approval of a ground

water withdrawal project to supply up to 9.70 mg/30 days of water to the applicant's public water supply system from new Well No. 4 and to increase the existing withdrawal from all wells from 9.70 mg/30 days to 19.42 mg/30 days. The increased allocation is requested in order to meet projected increases in service area demand. Well No. 4 will replace existing Well No. 3 as a water supply well because Well No. 3 has become an unreliable source due to local groundwater contamination. The applicant requests that the existing allocation for Well No. 3 (9.70 mg/30 days) be continued in conjunction with approval of the requested increase from Well No. 4 (9.70 mg/30) in order to accommodate continuing remediation of the contaminated portion of the aquifer. The water allocated to Well No. 3 will not be used in the public water system. The project is located in the Leithsville Formation in the Perkiomen Creek Watershed in Bally Borough and Washington Township, Berks County, Pennsylvania.

6. *Borough of Hopatcong D-92-85 CP-3*. An application for approval of a ground water withdrawal project to increase the withdrawal from 18.91 mg/30 days to 20.8 mg/30 days of water to the applicant's public water supply distribution system from existing Wells Nos. 1, 2, 3, 3A, 4, 5, 8, 12, Squire, River Styx and new Wells Nos. 14, 15, 16 and 17 in the Precambrian Crystalline Rock Formation. The project is located in the Musconetcong River Watershed in Hopatcong Borough, Sussex County, New Jersey.

7. *New Jersey American Water Company D-93-28 CP-3*. An application for approval of a ground water withdrawal project to supply up to 7.7 mg/30 days of water to the applicant's public water supply distribution system from Well Nos. 2 and 3 and to temporarily increase the withdrawal from all wells from 4.7 mg/30 days to 7.7 mg/30 days. The increased allocation is requested in order to meet projected residential demand until an interconnection is completed. The project is located in the Potomac Formation in the Raccoon Creek Watershed in Logan Township, Gloucester County, New Jersey.

8. *Sinking Spring Borough Municipal Authority D-94-31 CP-2*. An application for approval of the expansion of the existing wastewater treatment plant (WWTP) of the Sinking Spring Borough Municipal Authority. The application includes a proposed increase in the Authority's allowable discharge from 1.00 million gallons per day (mgd) to 1.25 mgd and related construction to expand the plant's
